PROFESSIONAL SUMMARY

Software Support Engineer with hands-on troubleshooting experience across Microsoft-stack business applications (C#, ASP.NET, SQL Server, SharePoint), backed by practical development experience from Volkswagen Group Africa work-integrated learning projects. Background also spans client-facing communication, documentation, process improvement, and recruitment/onboarding administration, gained across insurance and logistics environments. Comfortable working across technical and non-technical stakeholders, translating system issues into clear updates and documentation.

EXPERIENCE

Software Support Engineer | S4 Integration

February 2026 – Present

- Investigate, troubleshoot, and resolve software incidents, service requests, and support tickets within agreed SLAs across client business applications.
- Design, develop, test, and implement system enhancements and change requests.
- Present proposed system and process changes to the weekly Change Advisory Board (CAB) for production deployment approval.
- Liaise with client management, end users, and internal teams to gather requirements and communicate resolutions.
- Document technical solutions and support activities to maintain knowledge sharing and operational continuity.

Recoveries Handler | PEX Insure (contracted to MSL Legal Expenses, UK)

January 2025 – February 2026

- Recovered clients' additional losses (loss of earnings, insurance policy excess) following motor vehicle accidents.
- Completed file reviews to ensure required information was in place ahead of litigation.
- Communicated with stakeholders via phone and email.

Insurance Claims Handler | PEX Insure (contracted to EDAM Group, UK)

November 2024 – January 2025

- First point of contact for customers requiring credit hire vehicles following non-fault accidents.
- Accurately recorded and processed new claims within internal systems, ensuring data integrity.
- Coordinated vehicle recovery, repair, and replacement logistics through a nationwide partner network.
- Maintained clear, professional documentation across all stages of the claims process.

Recruitment Clerk | Takealot

April 2024 – September 2024

- Handled recruitment administration and data capturing.
- Scheduled and conducted driver applicant interviews.
- Sourced applicants via Greenhouse, social media platforms, and flyers.
- Managed onboarding of independent contractors and staff, and maintained employee documents.
- Conducted training and retraining sessions for drivers and staff.

Dashboard Clerk | Takealot

November 2023 – April 2024

- Performed daily cash-ups and shift handling for Mr Delivery drivers.
- Conducted driver uniform, bag, and vehicle inspections.
- Communicated with and assisted Mr Delivery customers as required.

PROJECTS

Work Integrated Learning | Volkswagen Group Africa

2025

- Extended an internal inventory management system: added Excel import with filtering by scan date and device name, a filterable results table, and export-to-Excel for records that failed to import due to unmatched serial numbers.
- Demonstrated the completed functionality to two IT managers.
- Gained exposure to the company's Change Advisory Board (CAB) process.

Work Integrated Learning | Volkswagen Group Africa

2024

- Shadowed development of an internal ASP.NET Core MVC award system built around the company's core values.
- Participated in software developer team meetings, gaining insight into project planning and structure.
